

Edit Menu

Edits objects, groups and symbols you have selected. Edit commands (except Undo, Repeat Last, Alter, Links and Insert Object) are dimmed until you select the objects you want to edit.

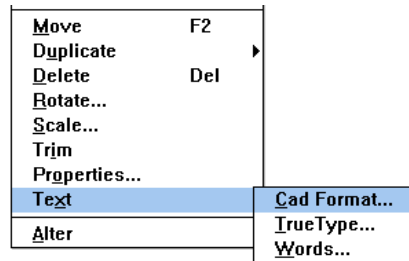

Undo	Undoes the previous operation	 <p>The screenshot shows the 'Edit' menu with the following items: Undo (Ctrl+Z), Repeat Last (F6), Cut (Ctrl+X), Copy (Ctrl+C), Paste (Ctrl+V), Paste Link, Paste Special..., Convert to Static Links..., Object, Insert Object..., Move (F2), Duplicate, Delete (Del), Rotate..., Scale..., Trim, Properties..., Text, and Alter.</p>
Repeat Last	Repeats the previous menu selection	
Cut	Copies selected objects onto the Clipboard and deletes them from the drawing	
Copy	Copies selected objects onto the Clipboard	
Paste	Pastes Clipboard graphics onto the Clipboard	
Paste Link	Pastes and links OLE objects into your drawing	
Paste Special	Lets you paste or paste link a specific graphic data type	
Convert To	Converts OLE objects to picture or bitmap	
Static	format	
Links	Updates links to OLE objects	
Object	Activates the selected OLE object	
Insert Object	Creates and embeds an OLE object	
Move	Moves Selected objects	
Duplicate	Copies Selected objects	
Delete	Removes selected objects	
Rotate	Rotates selected objects	
Scale	Resizes selected objects	
Trim	Clips lines, circles, arcs and textures with a trim line	
Properties	Changes colour, layer, line weight and line style of selected objects	
Text	assigns current text settings to the selected text	
Alter	Modifies vertices and line segments; places symbols in line, fixes corners	

OLE (Object Linking and Embedding) more about this in the Cadvance manual 3-120 Lesson 10
Object Linking and Embedding
