

Offset Point

Shortcut Keys Ctrl + F2

Offset Point command can only be selected from the keyboard (Unless a Toolbar button is allocated to this function)

Offset point allows you to start drawing at a known x and y distance from the Selected point

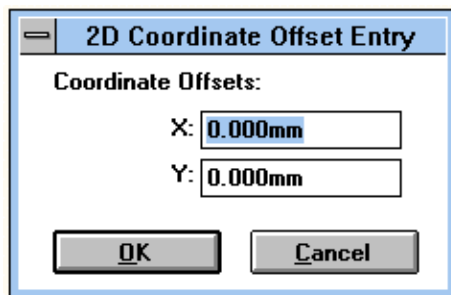

1. Prior to invoking the Offset Point Command, select a Draw command from the Draw menu or Tool bar
2. Hold down the [Ctrl] key and Press the [F2] key

The Prompt Line suggests the next step

3. The Required Snap Mode can be selected if not current.
4. Select the point to offset from.

The 2D Co-ordinate Offset Entry dialogue box appears thus:

5. Enter the required X co-ordinate, then press the [TAB] key to jump to the Y co-ordinate box. Enter the Y Co-ordinate the press Return or Click [OK]
